SCALE 1000 FT-1 INCH

Calgary, Alberta

July 11th 1921

Chief Engineer.

Legend: Land shown thes; ▨ denotes Non-Irrigable Land, which can only be Irrigated by carrying ditch in fill to same.

N.W¼ Section 24 East of Spillway equals 123·4 Acres. L.S. 5 equals 35·9 Acres. L.S. 6 equals 40 Acres. L.S. 7 equals 40 Acres. L.S. 8 West of Ditch equals 18·8 Acres. East of Ditch equals 18·45 Acres.

If a Roadway one chain in width be taken from off the Northerly Limit of L.S. 7 and 8 and a parcel one chain by one chain from out of the N.E. Corner of L.S. 6, the remaining areas will be as follows:-

L.S. 6, 39·9 Acres. L.S. 7, 38 Acres. That portion of L.S. 8 West of Ditch 18·15 Acres. East of Ditch 17·18 Acres.

If L.S. 5 and 6 were sold as one parcel, L.S. 7 and 8 separately from L.S. 5 and 6 and from each other, to Irrigate them namely L.S. 5, 6, 7 and 8, it would be advisable to have a delivery at "A" thence to "B" and West to "C."

Probably much less than one chain in width would be ample for said Roadway. If so, the areas given, will be proportionatly increased.
